  - Management of object selection and favourites
  - Simple and intuitive operation
- Configurable forms for the creation, maintenance and display of material master data
  - Graphical form editor for easy customization of forms
  - Function-dependent, rule-based form control
- Maximum interaction possibilities
  - Double click
  - Dynamic context menus
  - Drag'n'Drop
  - Multiple selection of objects
- Graphical control elements
- Context-sensitive, dynamic display and hiding of information and functions

Technology

- Based on ProFramework from ProNovia
- Extensive development and configuration of cross-object, modular applications possible
- First-class user experience independent of UI technology

Advantages

- Process-oriented and guided data maintenance
- Increased productivity through efficient navigation and manipulation of SAP material master data
- Consistent material master data through process-oriented maintenance and rule-based checks
- Integrative view of related material master data including structures and uses

- High user-friendliness through the definition of role-specific interfaces and forms, e.g. in the areas of logistics, engineering, etc.
- Cross-user and project-related handling of material masters through the integrated use of selection lists

Properties
- Customizing environment for extensive configuration
- Integration with other ProNovia products possible
- Business add-ins for customer-specific extensions
- Delivered GUI language support in German, English and French
- Detailed documentation in German and English
- Authorization objects for integration into the SAP authorization concept

Optional extensions
- For automated maintenance of material master data
  - **Pro**MaterialData
- For workflow-based testing and approval processes
  - **Pro**Process
- For integrated display of further SAP S/4HANA objects
  - **Pro**PLMClient

PRIMARY FUNCTIONS

In order to create and maintain a material master in SAP S/4HANA, ProMaterial offers various functions that simplify the work and increase the efficiency of the company. Data is created, maintained and displayed dynamically depending on the product lifecycle and data status.

- Clear presentation of master data
- Rule-based check of material master data
- Flexibly adjustable write protection
- Access to object-related SAP functions
- Integrated display of preview graphics

Clearly arranged and flexibly adaptable: The innovative user interface of ProMaterial significantly simplifies the creation and maintenance of material master data in SAP S/4HANA. Through the efficient navigation and manipulation of SAP material master data, you achieve a better quality of your data and increase your productivity at the same time.
